ENABLING A
SMART & SUSTAINABLE
CONSTRUCTION INFRASTRUCTURE

3-5 December 2020

Hall no. 4, Bombay Exhibition Center,
Goregaon, Mumbai
10:00 am to 6:00 pm

THE TWO POSITIVE DEVELOPMENTS THAT THE INDIAN CONSTRUCTION SECTOR CAN GAIN

The COVID-19 outbreak has not only adversely impacted the global economic scenario but also the Indian construction industry. Work on many of the ongoing construction projects was halted amid national lockdown. Now, getting an adequate workforce immediately for various construction projects have become a challenging task.

But this does not mean the end of India's growth story. **This article aims to throw light on two positive developments that the Indian construction sector can gain from.**

1. Delhi-Mumbai Expressway Project

Amid this crisis, the Government of India has taken steps to steer forward the growth and development in the construction sector. One such breakthrough initiative of the Government of India is the Delhi-Mumbai Expressway project.

The expressway shall open up business opportunities for companies that are interested in smart cities/villages development projects.

The project is also expected to fuel economic growth as it offers investment opportunities for MSMEs. This will further lead to infrastructure development in backward areas of Gujarat, Madhya Pradesh, Haryana, and Rajasthan.

2. Investment shifting from China to India

COVID-19 has triggered negative sentiments across many countries. Many MNCs who have manufacturing bases in China are now evaluating other options to shift their production base.

India, being a low-manufacturing hub, is a practical option to them. Also, the risk from being associated with the democratic government-driven country is lesser than the non-democratic government-driven country.

This can pave the way for more infrastructural development around the Indian manufacturing clusters and thus boost growth for the Indian construction sector.

About Us

- Concrete Show India is premium expo dedicated to the Construction and Infrastructure sector.
- The event promotes a solution-oriented approach which enables suppliers to engage with the construction & infrastructure value chain.
